

Picnic to Sharjah Desert Park

Class: Grade 1, 2 & 3

Date: February 21st, 24th, 25th, 27th, 28th, March 3rd, 4th

The school organized an educational trip to the Sharjah Desert Park for the students of grade 1, 2 & 3.

On reaching, the children were thrilled to see the huge park with all the beautiful animals in it.

At the Arabia Wildlife Centre they saw slithering snakes, wild lizards, rodents, poisonous scorpions, beetles and a huge variety of frogs. The students were amazed to see the variety of species that this park hosts: reptiles, amphibians, birds, nocturnal animals, aquatic animals and carnivores, moving about almost in their natural habitat.

On returning back to school, all the students happily shared their thrilling experience with their colleagues.

Plants that smell

Flowers produce some of the most beautiful smells, but a few smell like the worst.

The world's stinkiest plant in the world is said to be the Dead End. Its smell is like a mixture of burning sugar and rotten meat.

The black stink flower smells like a stink and is also known as the Malagasy Stinkwood. It smells like a stink and is also known as the Malagasy Stinkwood.

But not all stink plants are bad. Some are useful. The Rose Tree smells like fresh roses, and the Rose Tree is used for its beautiful smell.

Some plants even smell like the same as the stinkiest plant in the world. They are called stink plants.

النباتات وروائحها المميزة

تنتج بعض النباتات الرائحة التي تروق وتنتج البعض الآخر رائحة كريهة.

يُقال إن أكثر النباتات رائحة كريهة في العالم هي شجرة الموت. رائحتها تشبه خليطًا من السكر المحترق واللحم الفاسد.

تنتج شجرة الموت الرائحة كريهة وتسمى أيضًا شجرة الموت. رائحتها تشبه خليطًا من السكر المحترق واللحم الفاسد.

ولكن ليس جميع النباتات كريهة الرائحة. بعضها مفيد. شجرة الورد تترك رائحة ورد رائعة، وتستخدم شجرة الورد لرائحتها الجميلة.

بعض النباتات حتى تترك رائحة مشابهة لرائحة أكثر النباتات كريهة في العالم. تسمى هذه النباتات نباتات كريهة الرائحة.
