Letter from the Head of Foundation Stage

We would like to welcome everyone to a bright new chapter of learning and development. Commencing this journey with big dreams we are proud to say our accomplishments and successes are only starting to exceed and grow for the school and its students. With setting goals and creating innovative learning experiences for the children we are trying our best to improve the progress in educating a young child's brain. We believe that within the curriculum and the framework by EYFS standards we are able to provide the best teaching methods in terms of education and development for our students.

With great pride we can say that our students evolve to becoming happy, self-confident individuals expressing high potential and extraordinary creativity. Under the care of our skilled team of teachers, our children are always exposed to a productive learning environment where they are motivated to not only learn but develop their self-esteem, self-confidence and become aware of their own creative abilities.

The theme we focused on in the last month was '**Look at me**' which gave good knowledge to the children about themselves, the importance of family & home, friends & school. These included 'Parts of the body' and 'Five senses'. The children were taught on topics related to kindness, sharing, caring, cooperation etc. etc. We always make sure that the activities carried out should impart knowledge, information and develop a sense of awareness in the student. Moving forward to our next theme which is quite interesting is - **Healthy and Unhealthy Food**. This focuses on the importance of being healthy and to be aware of the selection of food for their growth and development.

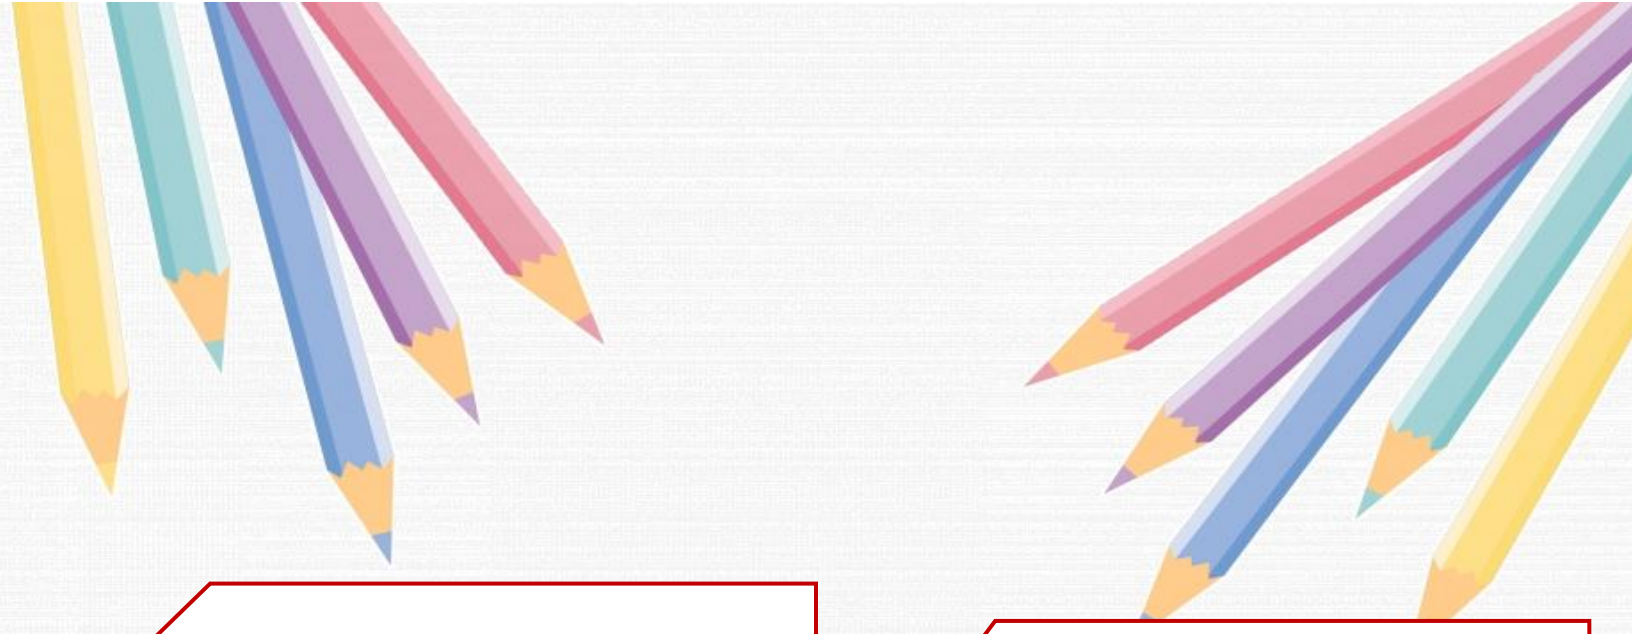

We will be organizing a National Day program to help them to know about the country they live in, its special features, cultures and traditions. Knowledge about the rulers of the different emirates and the geographical features.

Have a blessed month ahead!

Sr. Maria

Head of Foundation Stage

A Peek at October
